

Activate Your DNA Vault

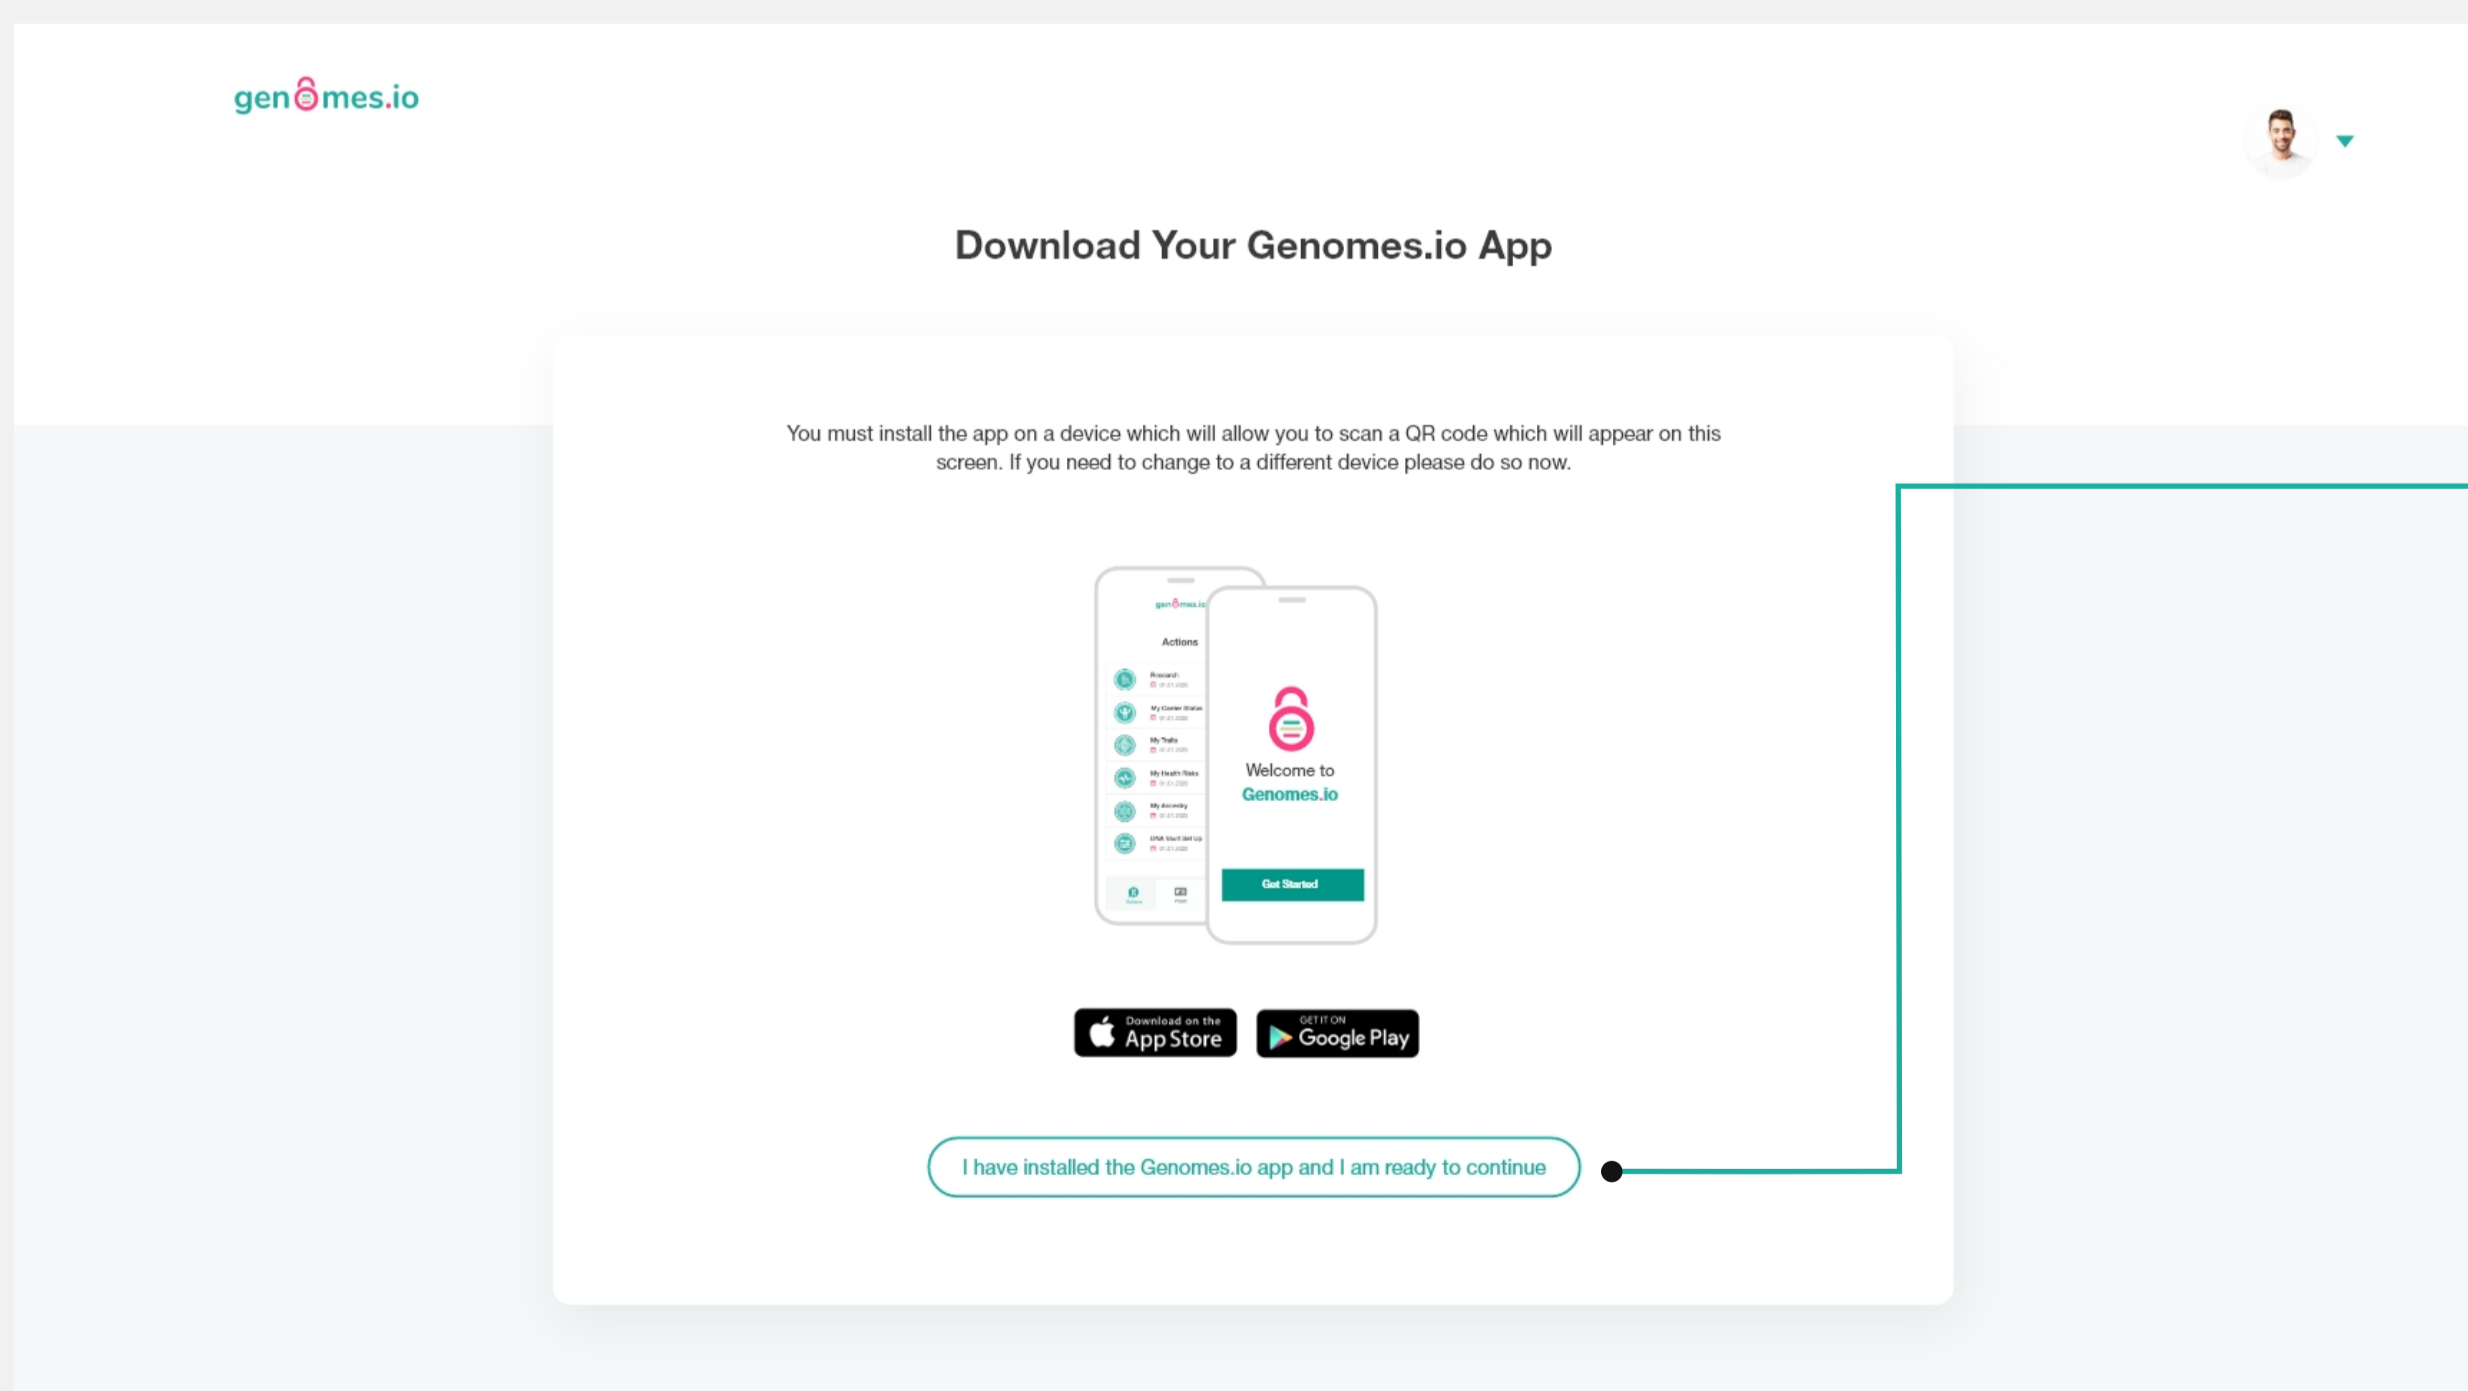

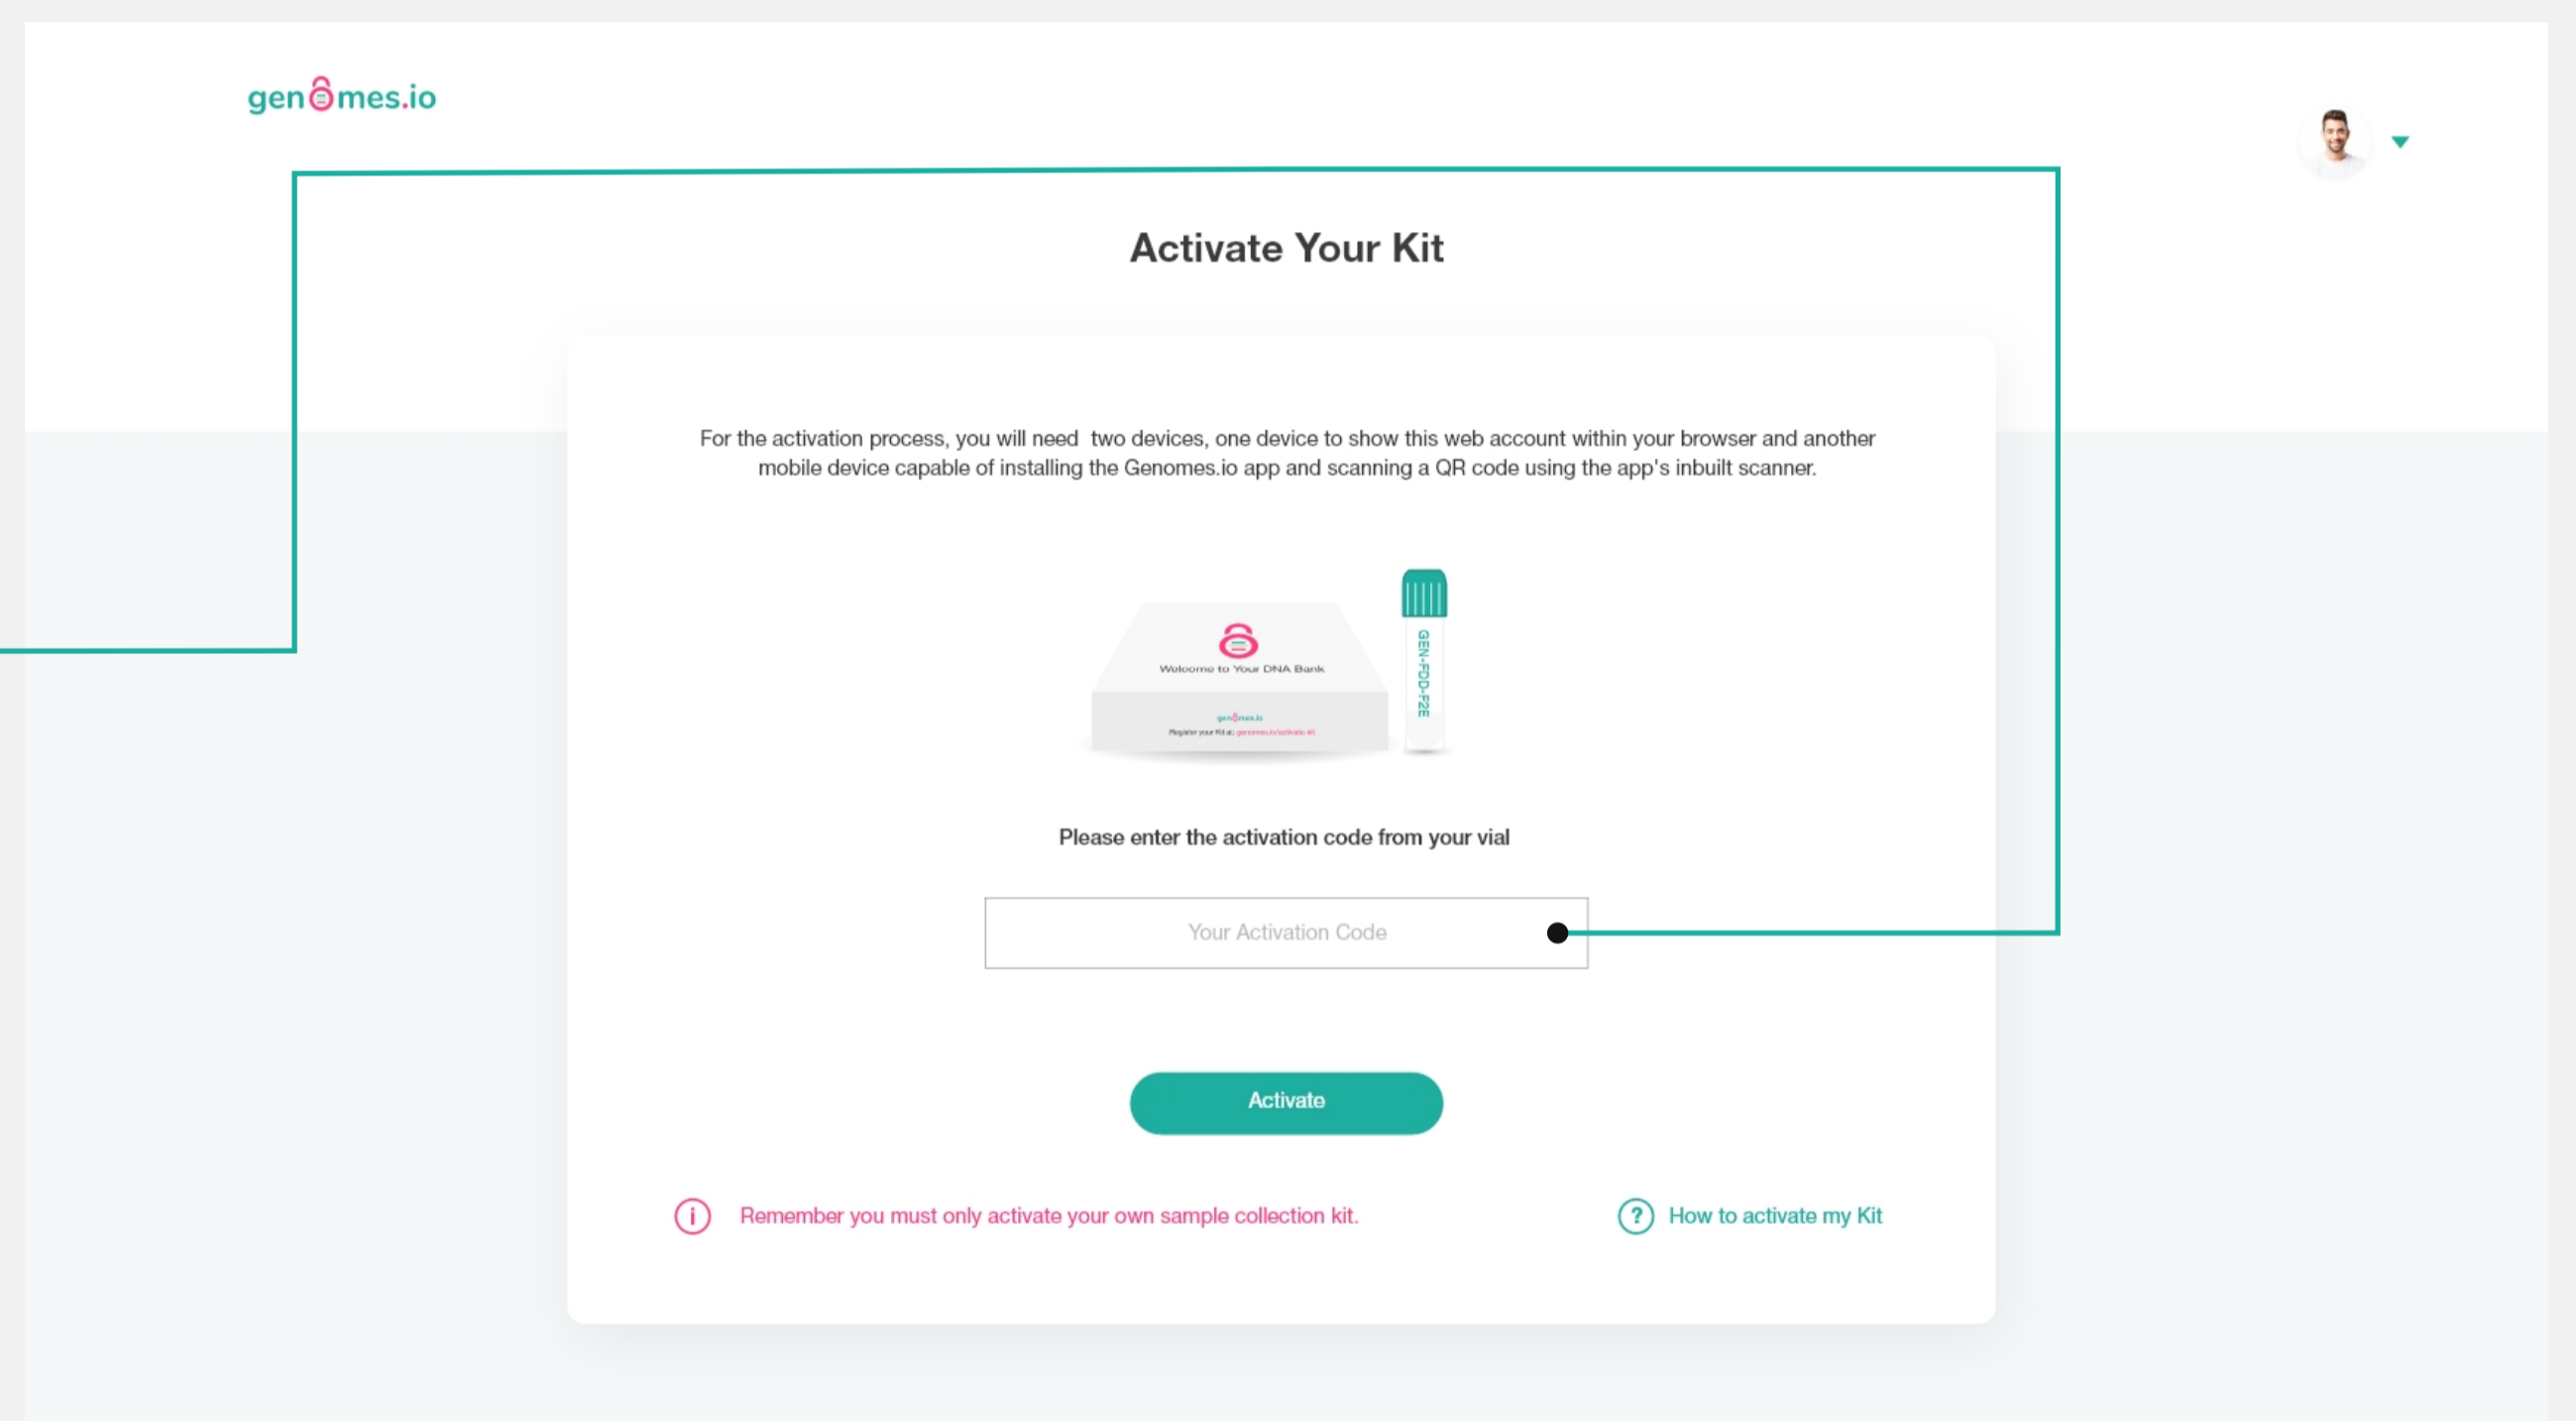

Click Activate Kit Button

After you have logged on to your genomes.io profile you will find two ways to start activating your kit and vault.

2

Please enter your sample ID code to activate your kit.

Your Sample ID code is present on the side of your vial. It is a 8 or 10 character alphanumeric code e.g NGWR1AXXXX . You should also find it on your instruction leaflet included in the kit. Please ignore any codes on the box or anywhere else on the kit or packaging.

Download your Genomes.io App

You can find it on Google Play or App store

or

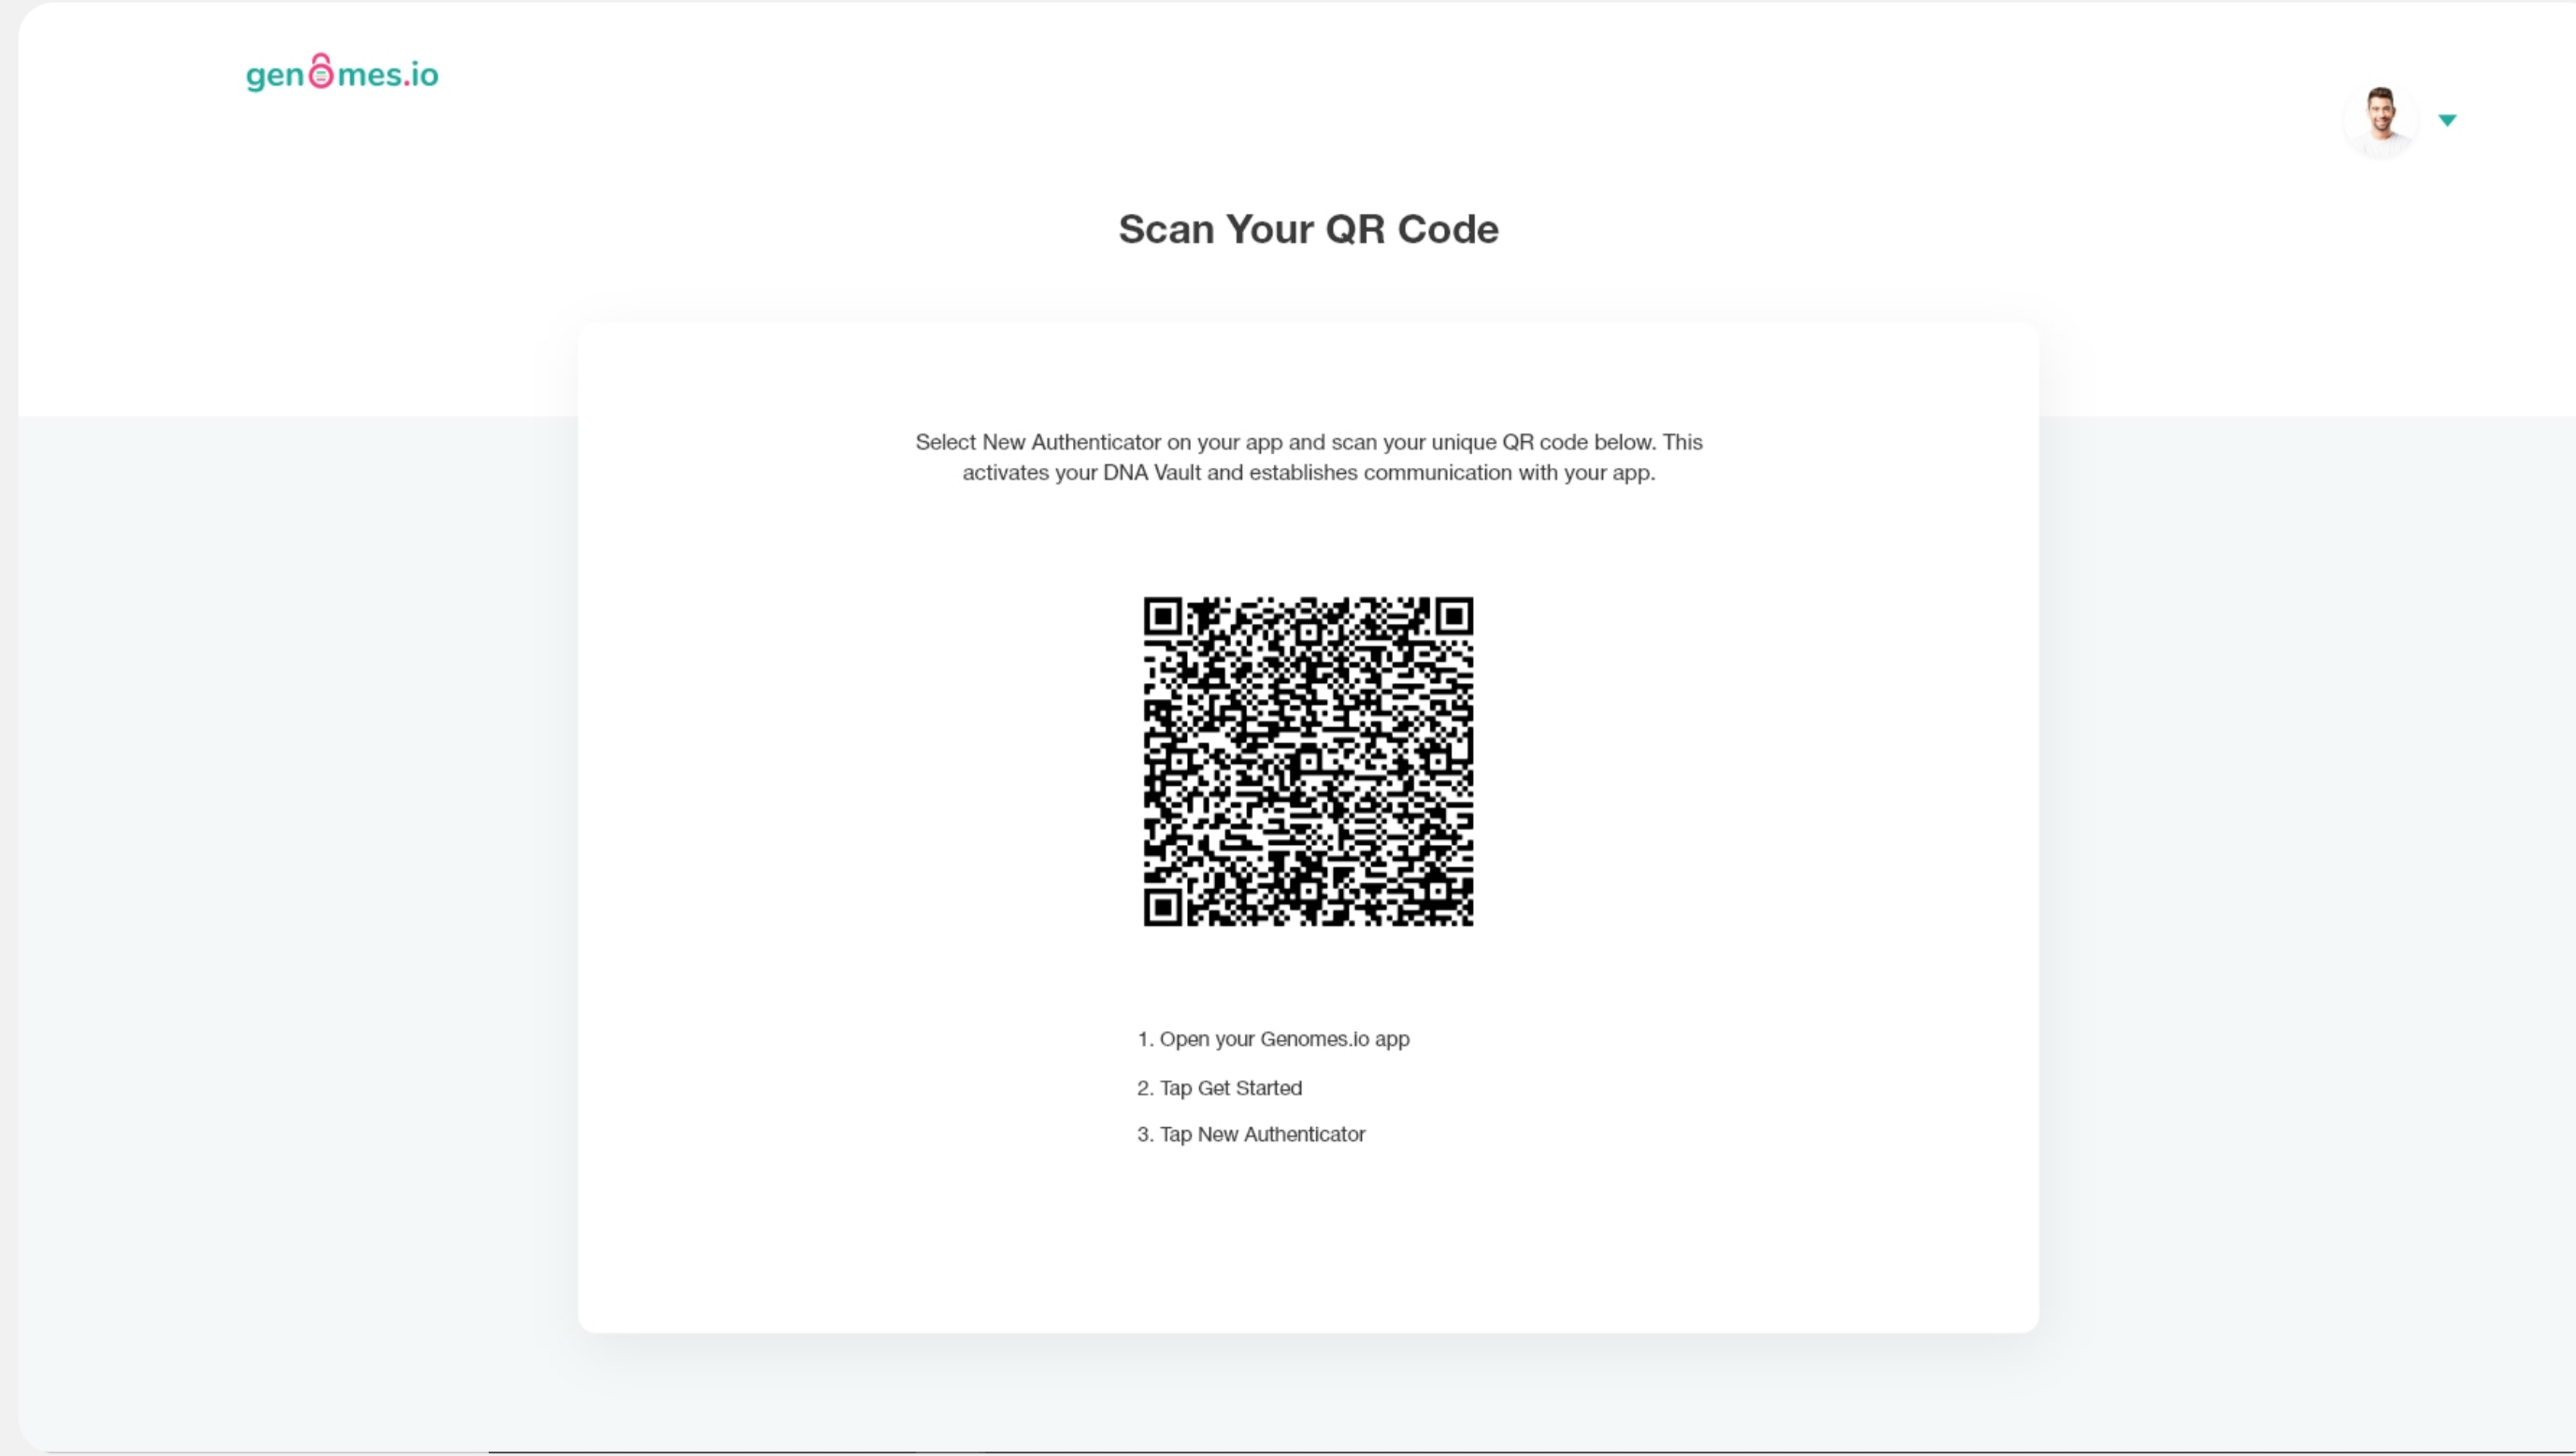

4

After downloading your app, please continue with the following instructions to set up your DNA Vault.

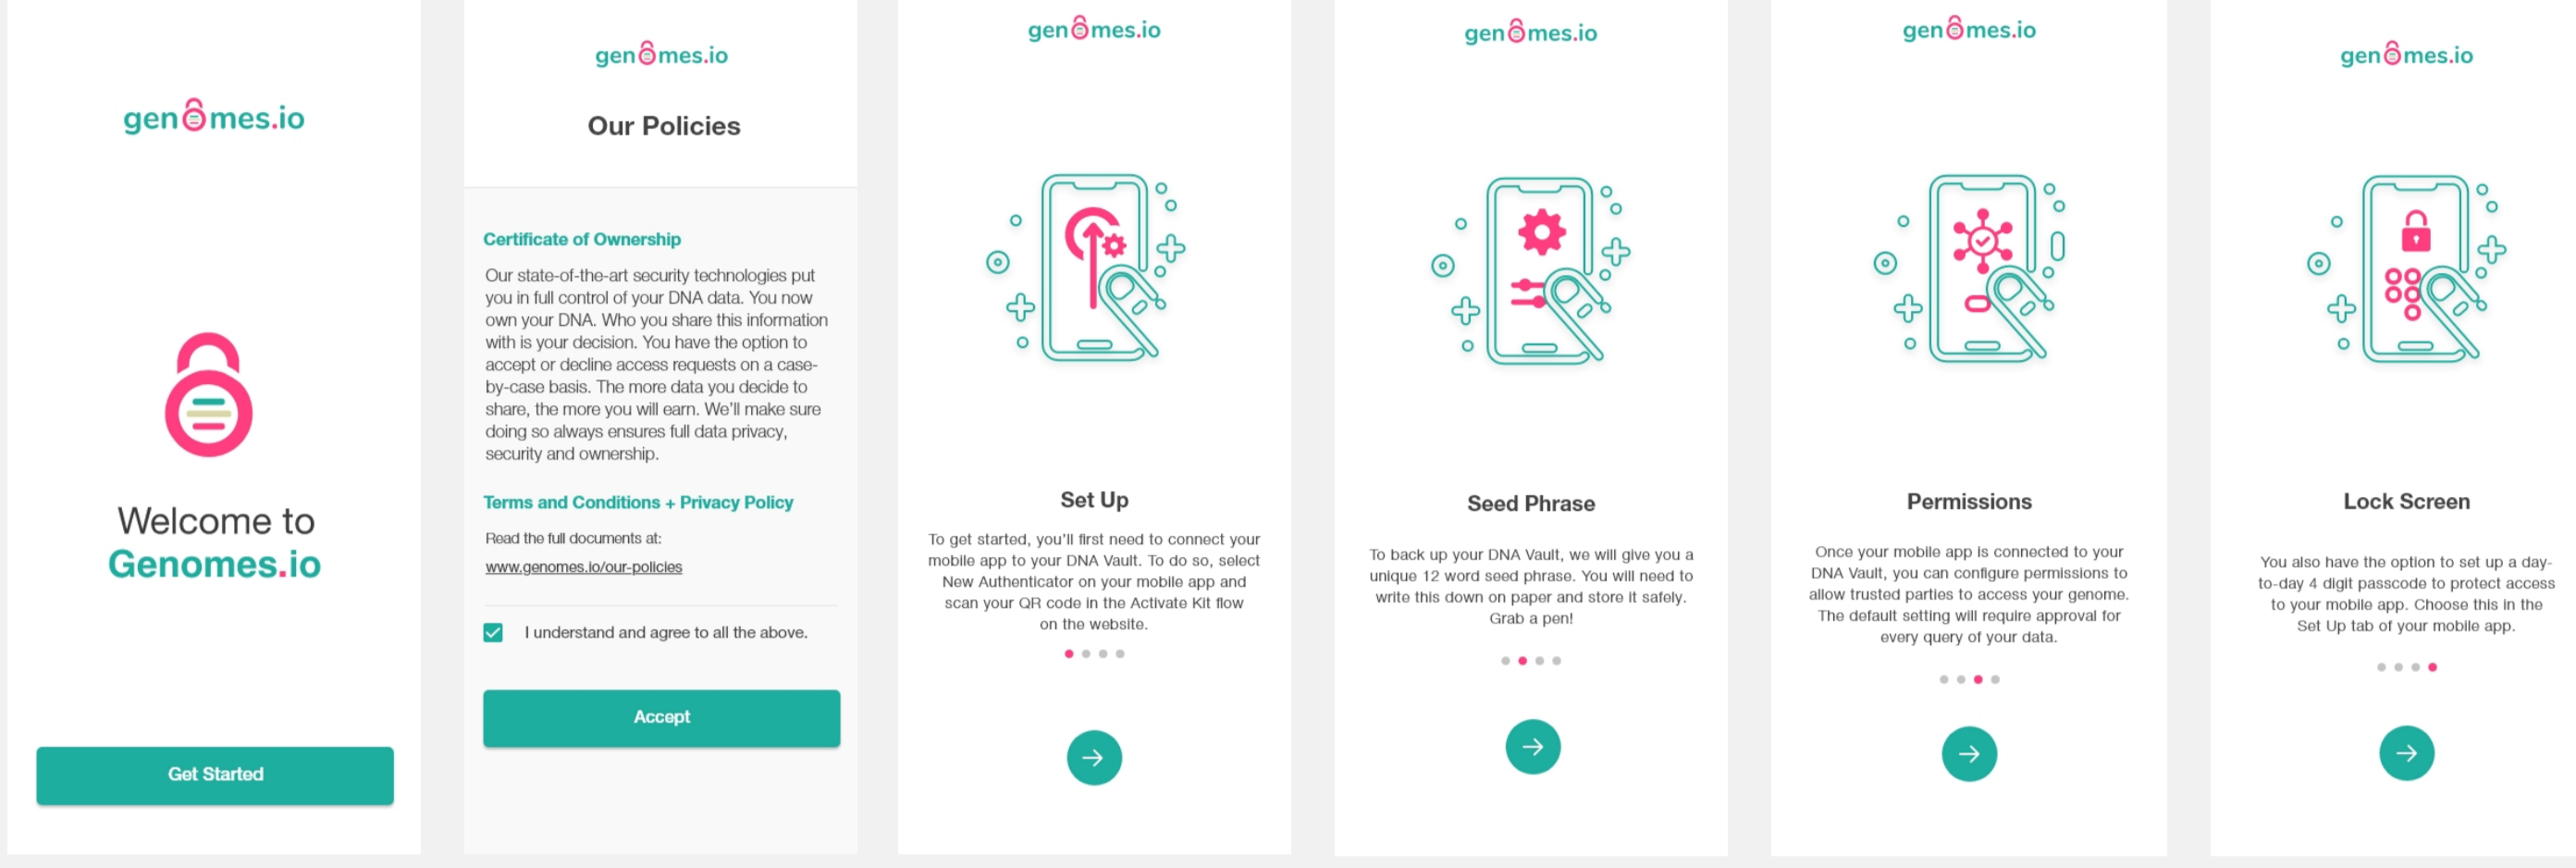

A Activate your DNA Vault

The following page should now be displayed on your web account.

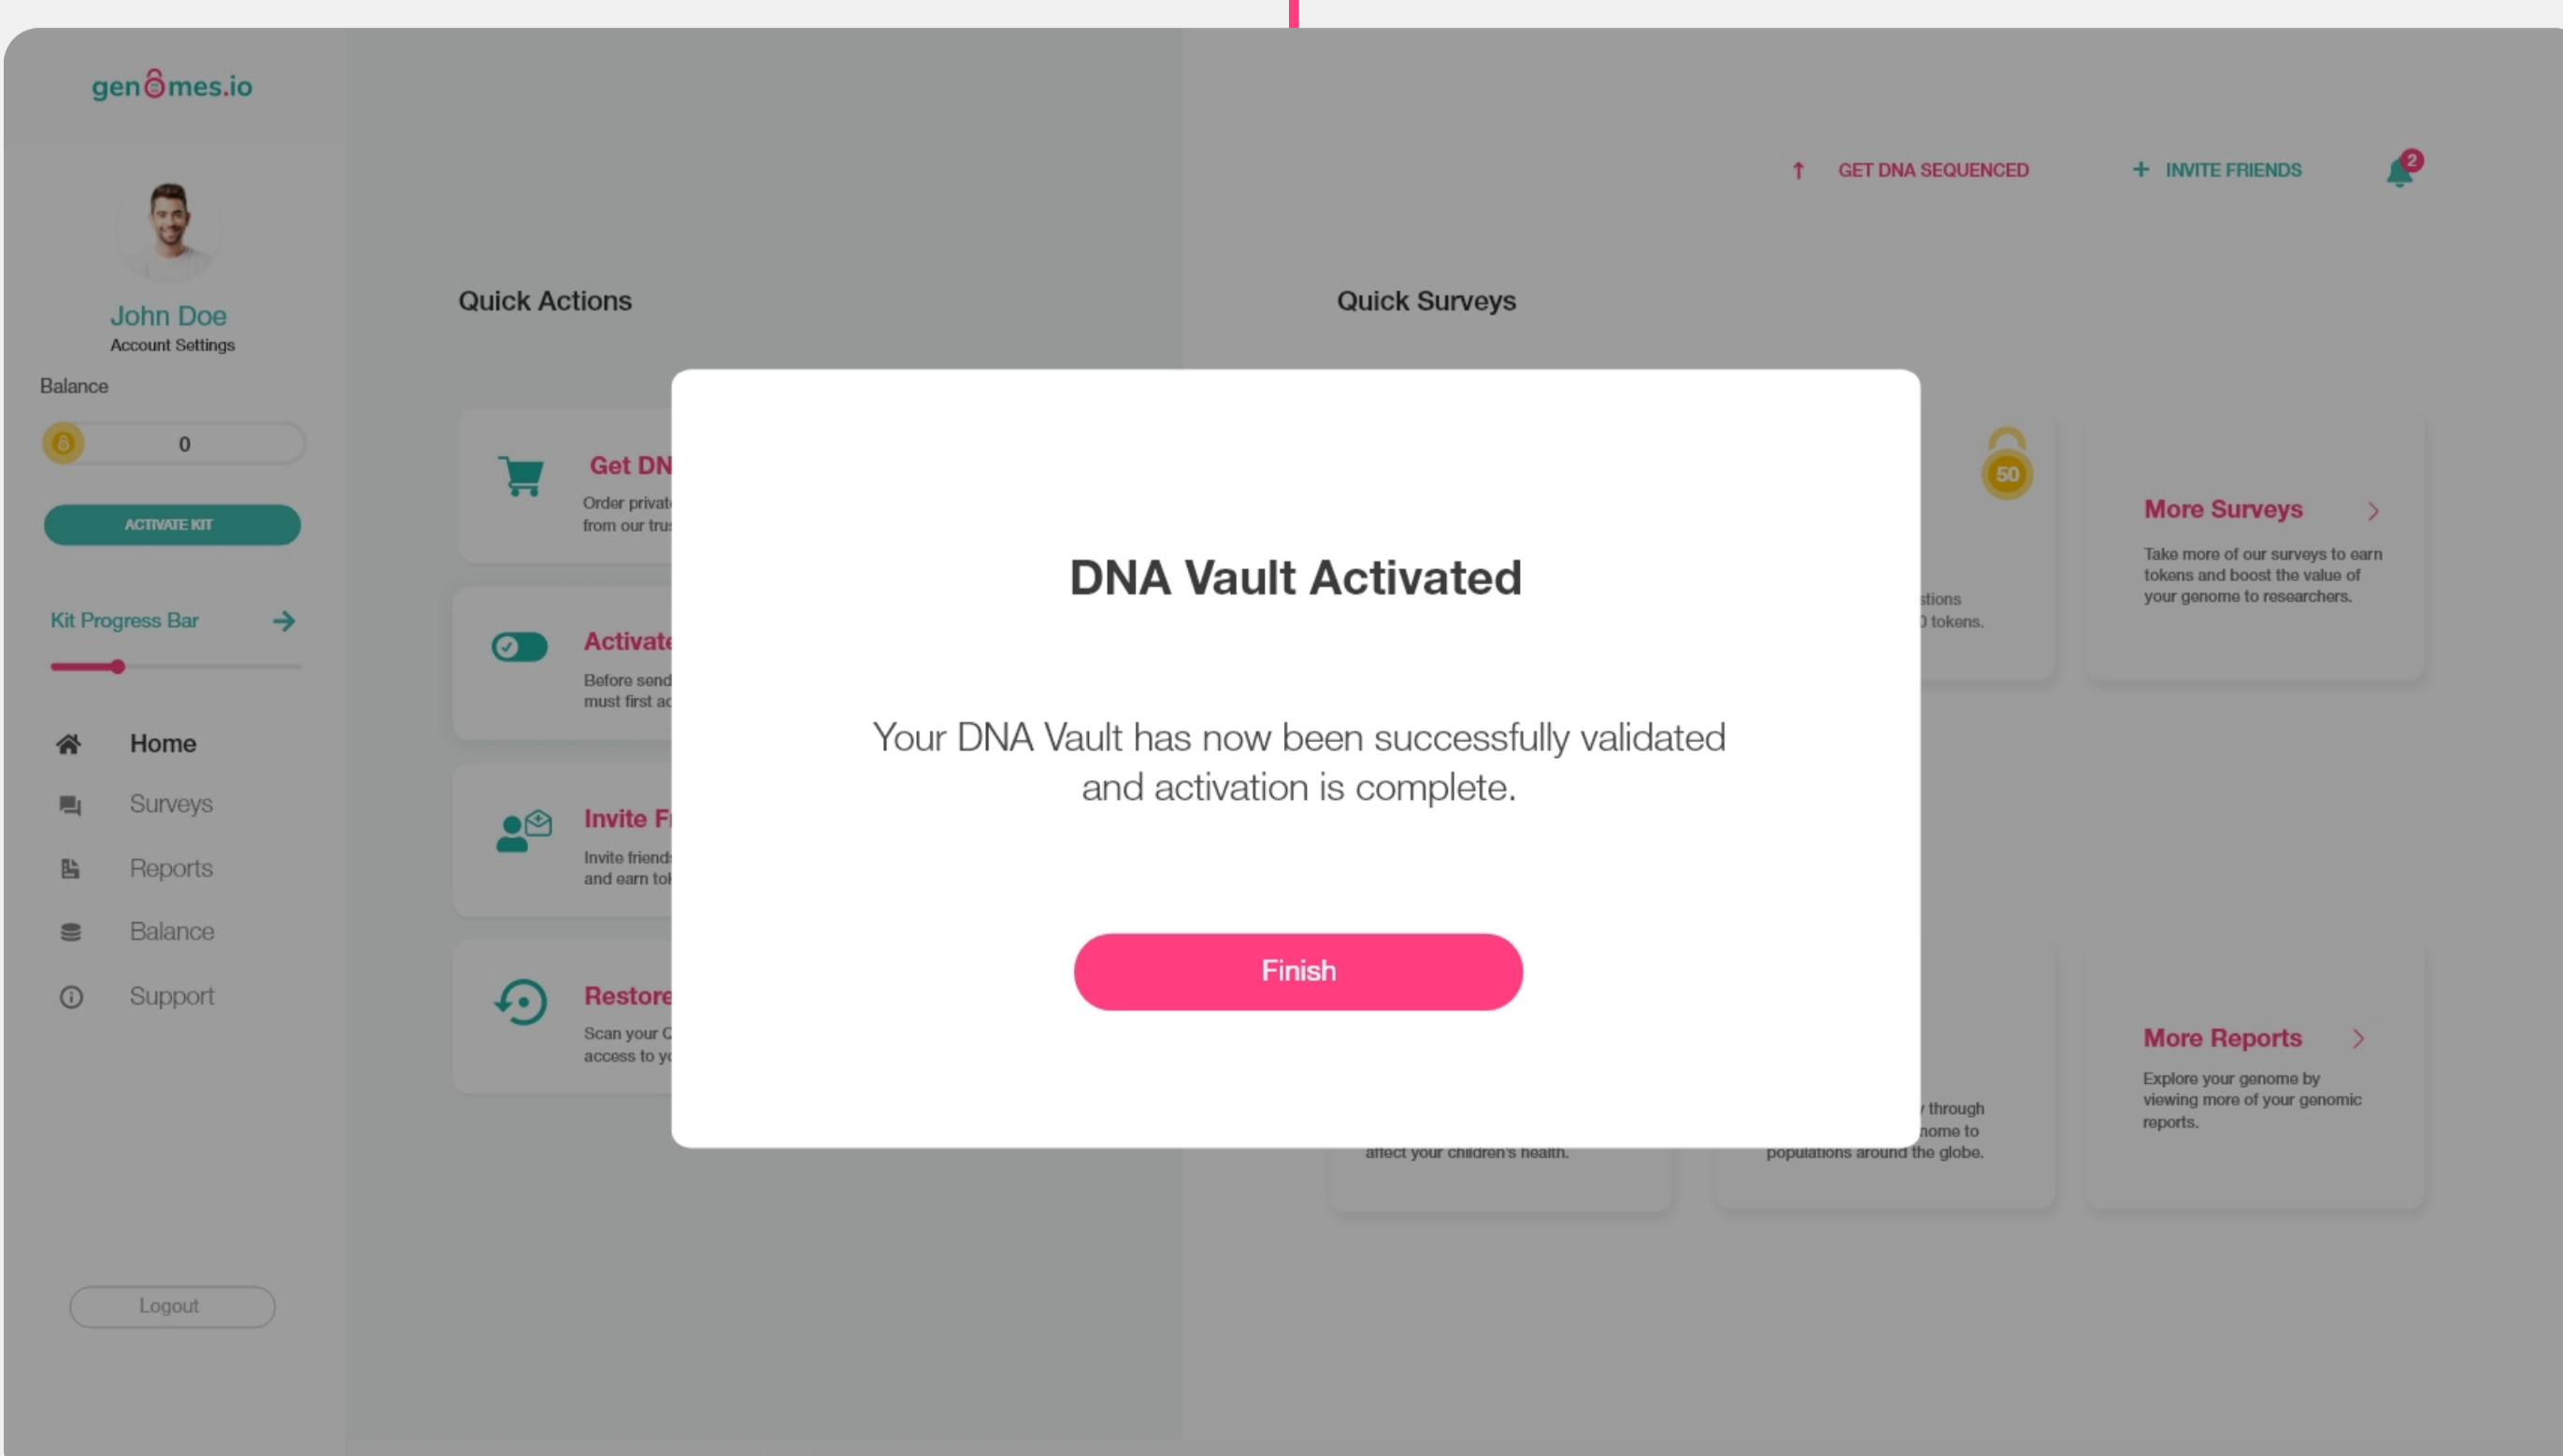

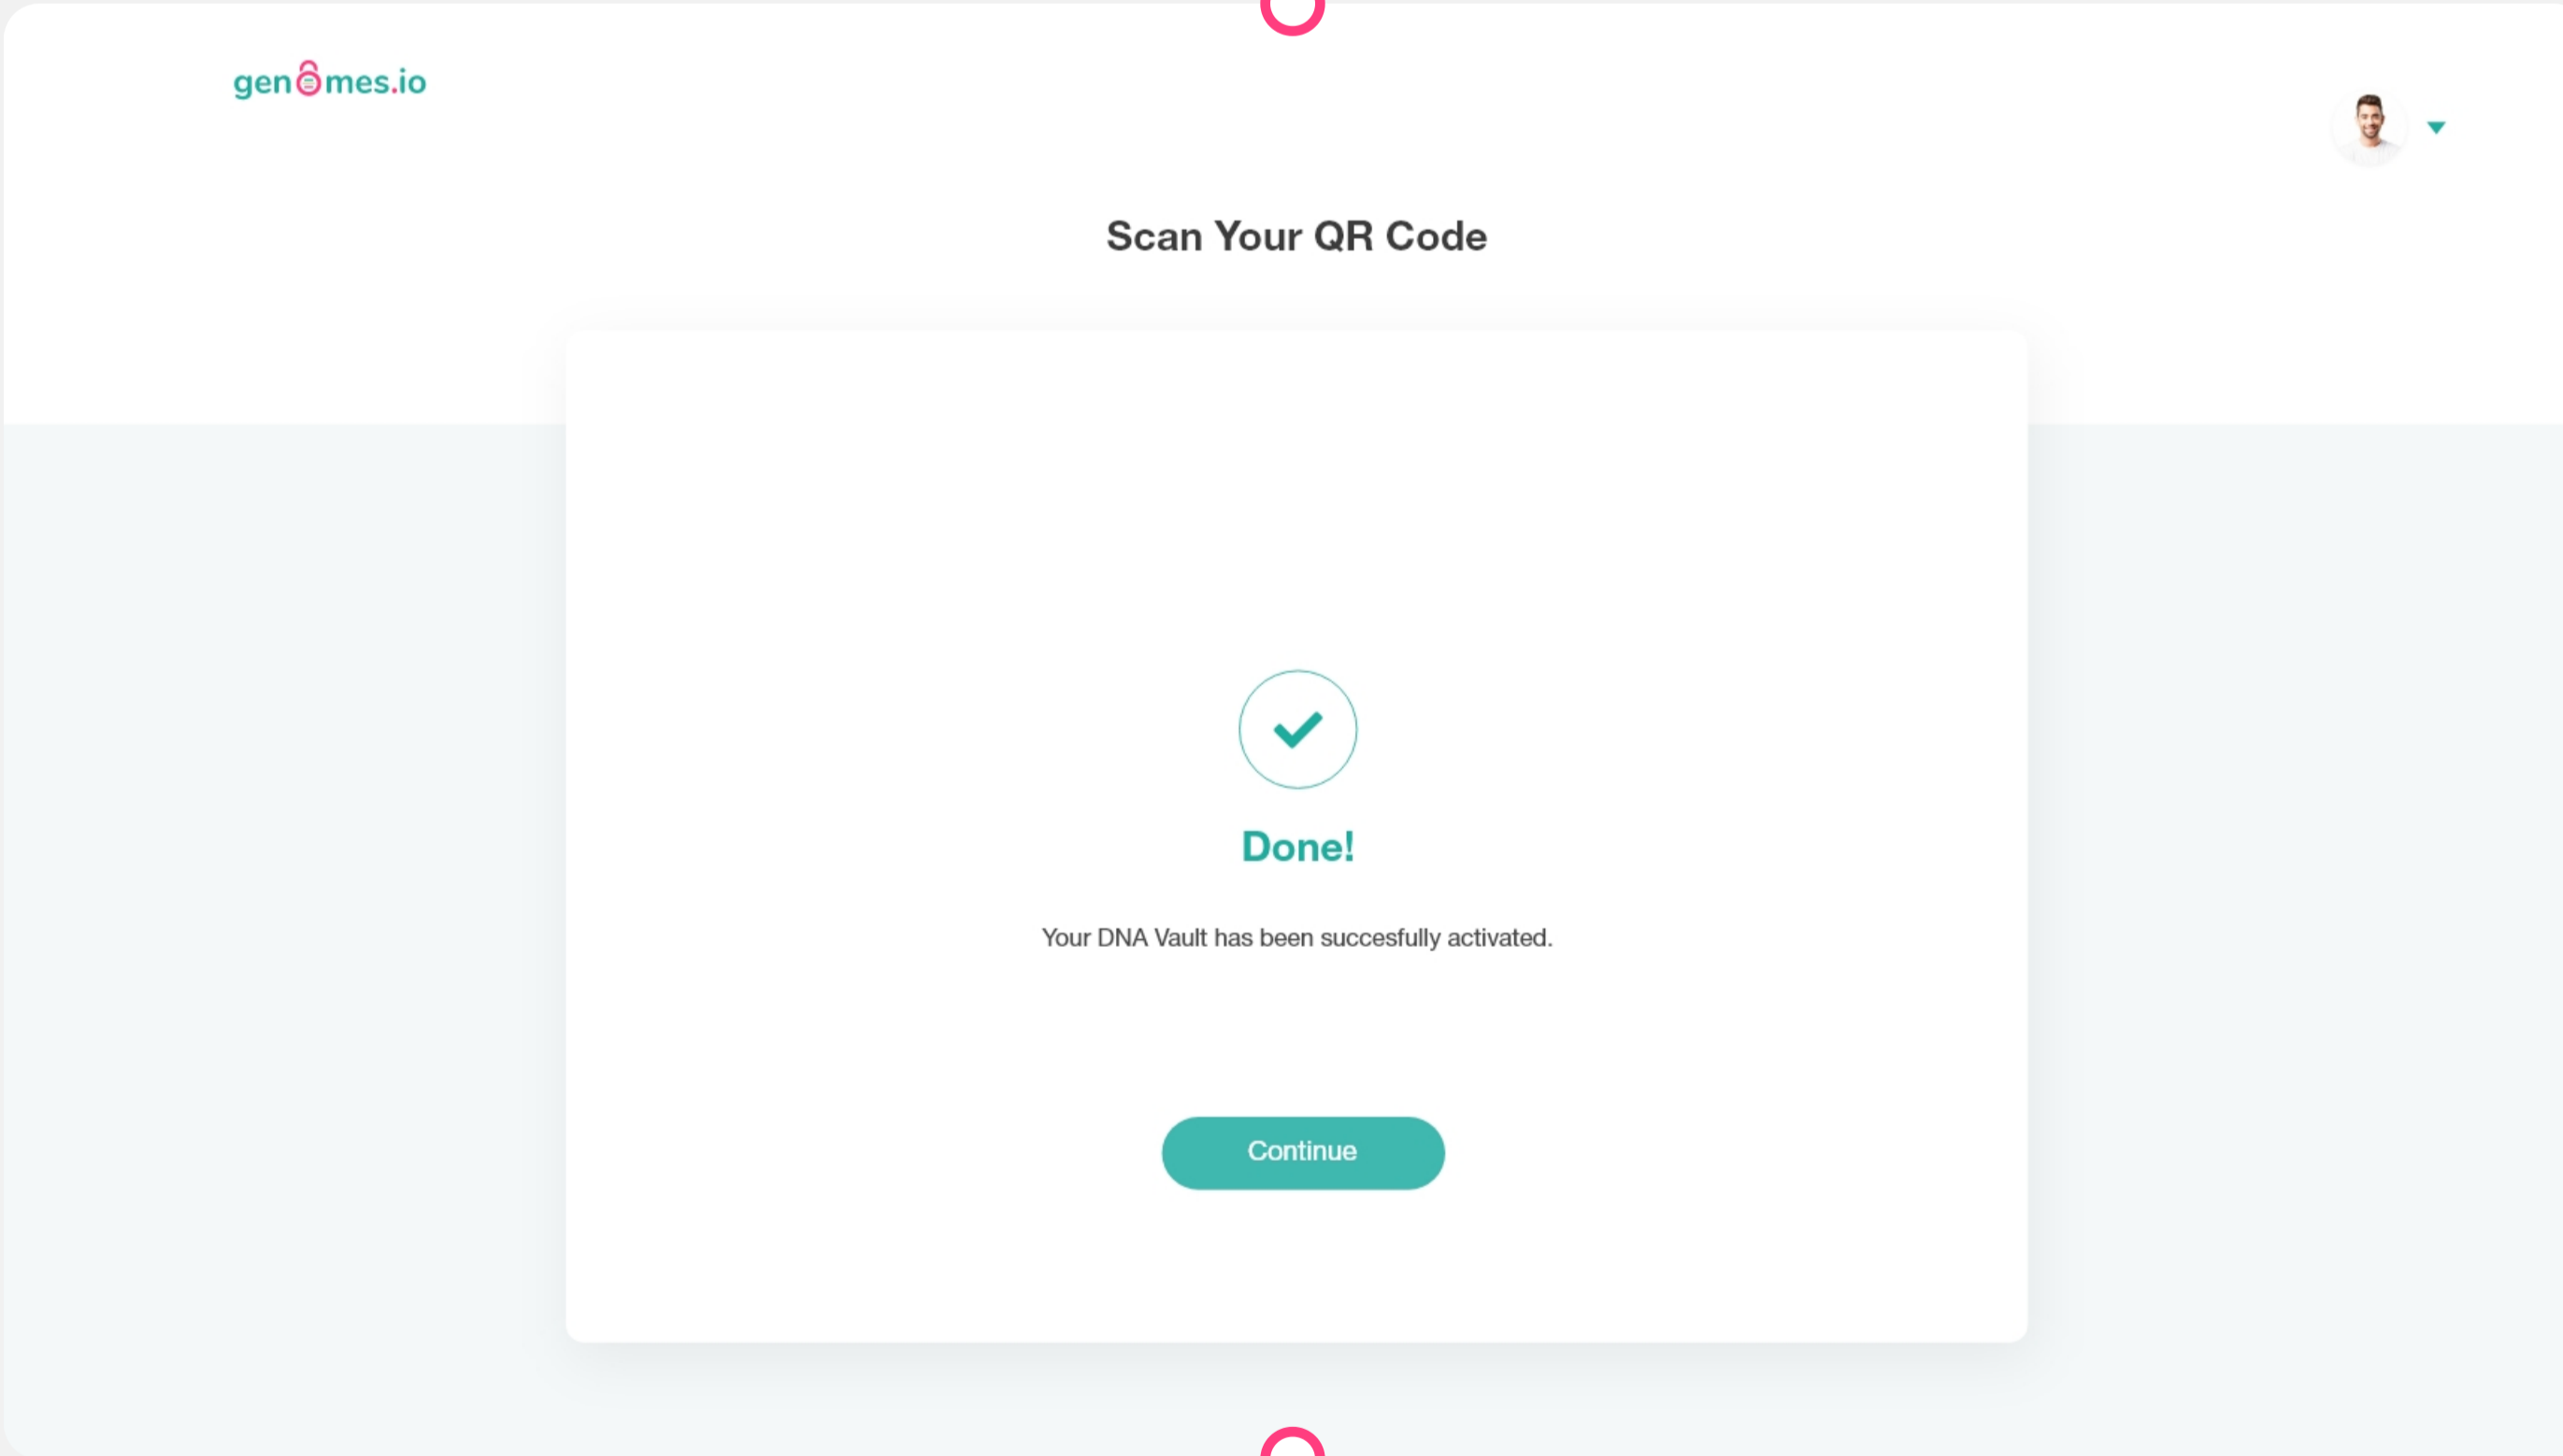

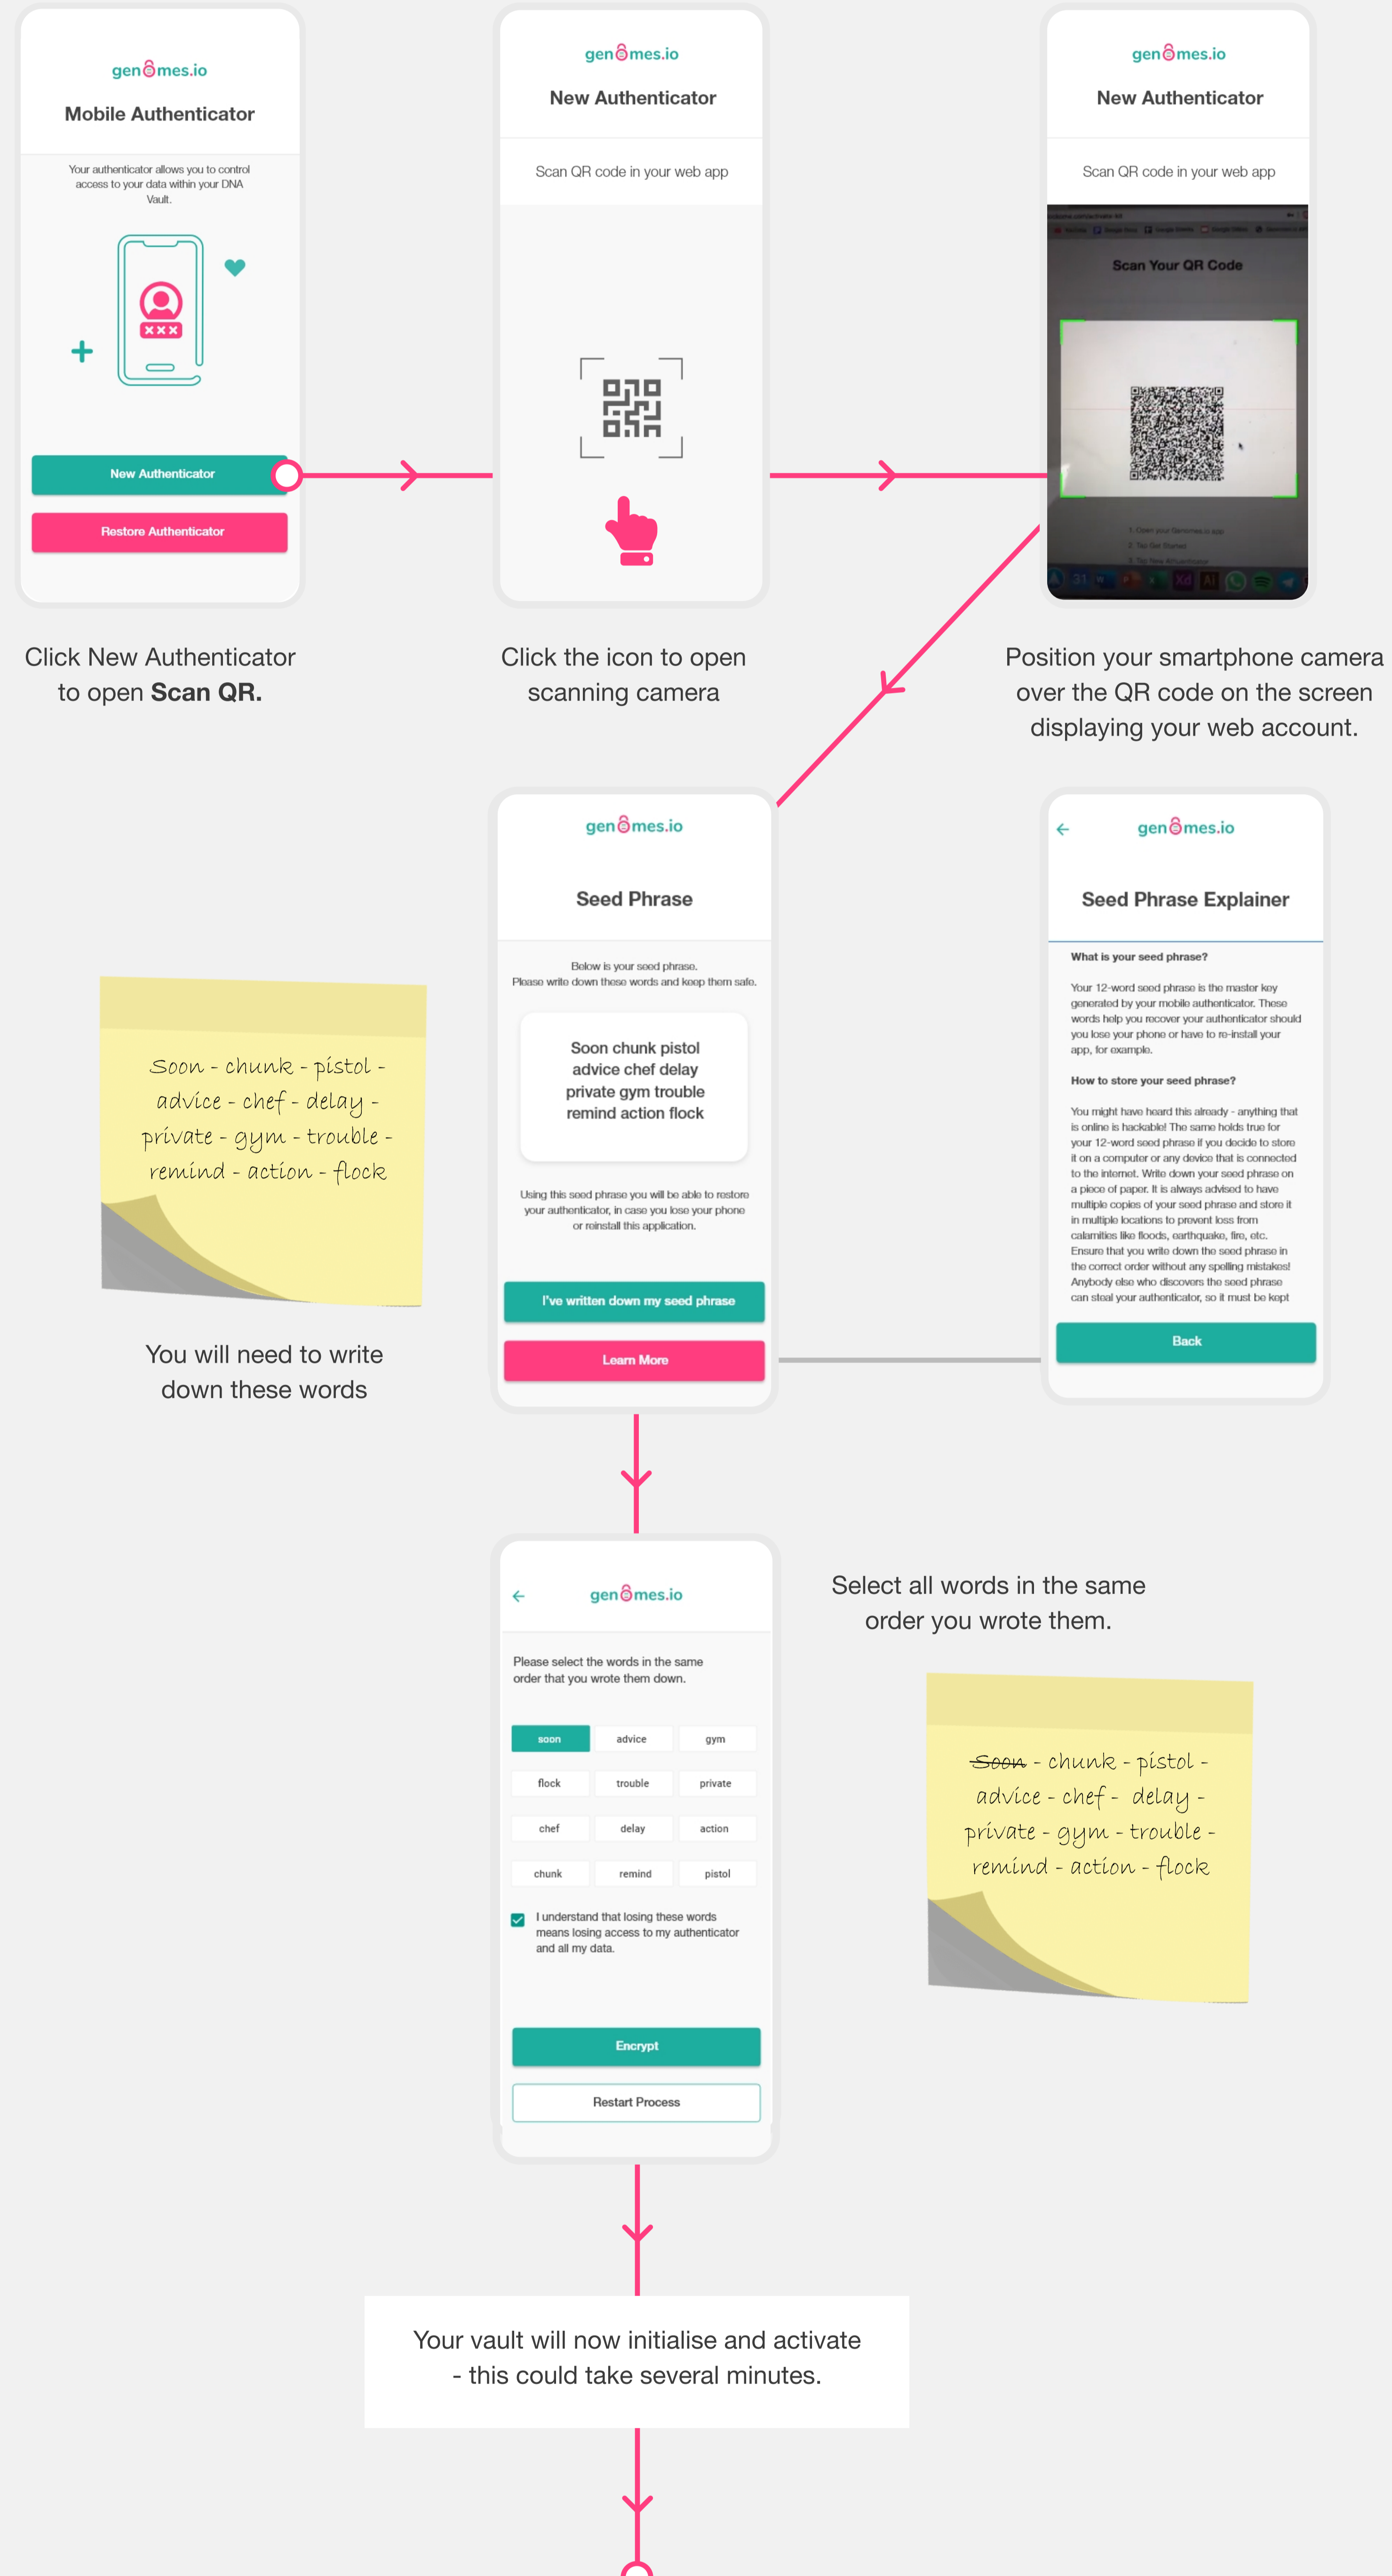

B Get Started

On your mobile device, open your Genomes.io app and follow the screens to get started.

C Set up your authenticator

D All Done - Now it is time to collect your sample!
